services

Diamond Tip Microdermabrasion } \$85
Microdermabrasion involves manual exfoliation of the outer layer of dead skin revealing fresher, clearer and smoother skin. This procedure promotes the production of new skin cells and stimulates the production of collagen. Microdermabrasion treats dull, sun damaged, aging skin as well as hyperpigmentation, melasma, brown spots and acne. Results are immediately visible and similar to a light chemical peel. A series of six to eight treatments are recommended initially to achieve optimal results, with a treatment every six to eight weeks thereafter.

HydraFacial MD } \$125
We are proud to be the first in WNY to offer this exciting new technology. The HydraFacial MD treatment is the newest advance in non-laser skin resurfacing. HydraFacial is the only hydradermabrasion procedure that combines cleansing, exfoliation, extraction, hydration, and antioxidant protection simultaneously, resulting in clearer more beautiful skin, with no discomfort or downtime.

The treatment is soothing, moisturizing, non-irritating and non-invasive. The HydraFacial procedure is suitable for most skin types, including thin or aging skin, ethnic skin, and dry or oily skin. The HydraFacial treatment improves the appearance of fine lines, wrinkles, congested and enlarged pores, oily or acne prone skin and hyperpigmentation or brown spots.

GlySal Peels and Dermabuilder } \$50
Ask how we can customize your HydraFacial with these services.

Glycolic and Salicylic Peels } \$50-\$80
Glycolic peels can effectively improve a wide variety of skin conditions, including fine lines, acne, uneven pigmentation, sun damage, and age spots. Depending on your skin type and condition, we may recommend a superficial or medium peel. The end result will be tighter, smoother, more evenly pigmented skin, with fewer lines and blemishes. A series of peels are recommended for optimal results.

TCA Peels } \$85-\$125
These peels are medium depth peels. They reach slightly deeper into the skin than AHA (Glycolic) or BHA (salicylic) peels. TCA is a skin resurfacing treatment. This peel improves fine lines and wrinkles, hyperpigmentation, tone, texture, and superficial acne scars. A series of peels may be recommended for optimal results.

Platinum Peel } \$225
This peel is compounded especially for us. It combines TCA, Salicylic and Retinoic acid in a two-step process. This treatment is our most aggressive peel. It will improve fine lines, wrinkles, age spots melasma, acne, and uneven pigmentation. The results are amazing.
